Summary

Backend and AI systems engineer with hands-on experience in designing scalable APIs, ETL pipelines, Retrieval-Augmented Generation (RAG) systems and ML-powered analytics platforms. Built AI systems over large-scale structured datasets and knowledge graphs with focus on backend engineering, data-driven applications and measurable outcomes. AWS Certified Cloud Practitioner and AWS Certified AI Practitioner with dual ServiceNow certifications. Seeking Software Engineering and ML Engineering internship opportunities.

Experience

Software Engineering Intern

Dec 2025 – Mar 2026

Secret Eye (Early-stage AI analytics startup)

- Built Flask REST API pipelines integrating NLP-based content extraction and semantic ranking for real-time scraped data, reducing manual analyst review effort by **40%**.
- Designed ETL workflows for ingesting and transforming data from APIs and structured datasets into centralized stores supporting downstream analytics and ML workflows.
- Integrated backend services emphasizing scalable architecture patterns and production-focused development.

Content Head & Technical Lead

Sep 2023 – Present

AWS Cloud Club, JECRC University

- Wrote Boto3 scripts automating EC2 launch, S3 bucket configuration and IAM role assignment for cloud lab environments, eliminating repetitive setup effort.
- Conducted cloud and Git workshops impacting **100+ students** and led technical initiatives across teams.

Projects

MediFast AI

Node.js, MongoDB, ChromaDB, LangChain, Telegram APIs

github.com/Ruchin-Audichya/medifast-bot

- Engineered a RAG-powered Telegram medicine assistant using hybrid BM25 + ChromaDB retrieval, improving medicine search match rate from **29.7% → 47.7%** across multilingual, typo-tolerant and symptom-based queries.
- Built a medicine knowledge graph containing **169K+ medicine records**, **681K+ side-effect entries**, and **1.3M+ relationship edges** across medicines, symptoms, alternatives and precautions.
- Implemented contextual family intelligence and semantic memory workflows enabling personalized retrieval and recommendation systems.
- Built geospatial pharmacy discovery using MongoDB 2dsphere indexing and OpenStreetMap integration supporting location-aware pharmacy ranking.

Placify AI

React, Node.js, PostgreSQL, AWS, Python, CatBoost

github.com/shriya-gakkhar1/Minor-Project

- Built a placement intelligence platform using **React, Express, FastAPI, CatBoost, PapaParse, and SheetJS** processing **5000+ student records** into PostgreSQL-backed dashboards.
- Developed CatBoost-based prediction pipelines with feature engineering techniques achieving **84.7% classification accuracy** and **94.5% ROC-AUC** on validation data, outperforming baseline models.
- Implemented resume parsing, skill-gap analysis, and personalized recommendation workflows enabling actionable insights.
- Automated ETL pipelines reducing manual data processing effort by **70%**.

Technical Skills

Languages: Python, JavaScript, Java, C++, SQL

Backend: Node.js, Flask, Express.js, REST APIs

AI / ML: LangChain, RAG, NLP, Scikit-learn, PyTorch, CatBoost

Cloud & Infrastructure: AWS (EC2, S3, IAM), Docker, Terraform

Databases: MongoDB, PostgreSQL, ChromaDB, Geospatial Indexing

Engineering: ETL Pipelines, System Design, API Development, Data Structures, Algorithms, OOP, Agile, CI/CD, Git

Education

JECRC University

Aug 2023 – Jul 2027

B.Tech Computer Science Engineering — AWS Cloud Specialization

CGPA: 8.2/10

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Machine Learning

Achievements & Certifications

- **Cognizant Technoverse 2026** — Grand Finale qualifier; **Top 24 nationwide** from **2000+ teams** with MediFast AI.
- **Smart India Hackathon 2024** — National Finalist.
- **AWS Certified Cloud Practitioner**
- **AWS Certified AI Practitioner**
- **ServiceNow Certified System Administrator (CSA)**
- **ServiceNow Certified Application Developer (CAD)**
- Solved **250+ DSA problems** on Leetcode.
