PROFESSIONAL SUMMARY

AI & Cloud Engineer with strong expertise in Agentic AI systems, LLM workflows, and cloud automation. Certified in ServiceNow (CSA, CAD), Salesforce Agentforce AI, and AWS AI, with hands-on experience building scalable AI-driven solutions and automation systems.

Proven ability to design intelligent workflows, secure cloud architectures, and data-driven systems. Currently developing enterprise-grade AI agent workflows aligned with consulting and healthcare use cases.

Seeking roles in AI Engineering, Cloud, or Tech Consulting (Atrium, Big 4, Healthcare Tech).

EDUCATION

JECRC University, Jaipur

B.Tech in Computer Science (AWS Cloud Computing)

Aug 2023 – July 2027

CGPA: 8.2/10 (Top 25%)

Relevant Coursework: Cloud Security, DBMS, Data Structures, AI Systems, Cyber Risk

CERTIFICATIONS

- ServiceNow Certified System Administrator (CSA) – 2026
- ServiceNow Certified Application Developer (CAD) – 2026
- Salesforce Certified Agentforce Specialist (AI) – 2026
- AWS Certified AI Practitioner – 2026
- AWS Certified Cloud Practitioner – 2025
- Google Cloud Foundations

TECHNICAL SKILLS

AI & LLM Engineering: LangChain, LLM Workflows, Agentic AI Systems, Prompt Engineering, RAG Pipelines

Cloud & DevOps: AWS (EC2, S3, IAM, Lambda, VPC), Docker, Terraform, CI/CD, GitHub Actions

Development: Python, Java, Flask, Spring Boot, REST APIs, JSON, Microservices

Data & Automation: SQL, Pandas, NumPy, Data Pipelines, Excel Automation, SOQL

Platforms: ServiceNow, Salesforce, Jira

EXPERIENCE

AI Workflow Developer (Project – Cognizant Aligned Use Case)

2026 – Present

- Designing agentic AI workflows using LangChain and LLM orchestration for enterprise automation
- Built multi-step decision agents capable of workflow automation and contextual reasoning
- Integrated APIs and cloud services for real-time AI-driven task execution
- Focused on scalable, modular architecture for enterprise deployment

Technical Lead – AWS Cloud Club, JECRC

Sep 2023 – Present

- Automated AWS lab environments using Python and Boto3, reducing setup time by 40%
- Designed secure IAM-based architectures aligned with cloud governance practices
- Led a team of 5 developers ensuring CI/CD and code quality
- Authored SOPs adopted by 100+ students

Outreach Lead – AICTE Gen-G Internship (OPPO + 1M1B)

May 2024 – Dec 2024

- Led AI and cloud programs across 20+ institutions impacting 5000+ students

- Built Python dashboards featured in AICTE national reports
- Managed execution ensuring compliance and performance tracking

Campus Ambassador – JECRC University

Apr 2025 – July 2025

- Developed automated tracking system using Google Sheets and scripts
- Improved reporting efficiency and reduced manual errors

PROJECTS

AI-Powered Marketing Automation Tool (SecretEye Telematics Pvt Ltd)

- Built intelligent automation system for customer targeting and campaign execution
- Implemented AI-based lead segmentation and engagement tracking
- Reduced manual marketing efforts through workflow automation

Automated Compliance & Audit System (Python, Flask, REST APIs)

- Developed backend system for audit logging and compliance tracking
- Built structured pipelines ensuring 100% data consistency
- Reduced manual audit effort by 70%

Salesforce AI Student Management System

- Created AI-driven dashboards using SOQL and automation tools
- Improved data accuracy and reduced manual tracking by 50%

Infrastructure as Code Deployment System (AWS, Docker, Terraform)

- Built reproducible cloud environments with IaC
- Reduced deployment time by 85%

KEY ACHIEVEMENTS

- Smart India Hackathon Finalist (Top 50)
- Built multiple AI + Cloud production-ready systems
- Recognized for leadership and technical contributions

ADDITIONAL STRENGTHS

- Strong in Prompt Engineering and AI System Design
- Frontend knowledge for AI tools and dashboards
- Strong problem-solving and fast learning ability
- Passionate about AI, automation, and scalable systems
